PROFESSIONAL EXPERIENCE

Cloud Data Engineering, *Axtelica Solutions Private Limited*   jan 2025 – July 2025
- worked on Kafka and Configure AWS S3 with MySql using Python
- Understanding of ETL processes and data pipelines
- Get hand on Experience on cloud (AWS EC2,S3), Python Development , SQL

Data Analytic Intern, *Prodigy InfoTech*   Aug 2023 – December 2023
- Worked on projects:
- Explore the relationships between variables and identify patterns
- and trends in the data
- Performing Exploratory Data Analysis on given data to retrieve trends

EDUCATION

- **Computer Science and Engg,** *Dronacharya College of Engg (MDU)2020-2024:*   ***8.0cgpa***
- **12th (PCM),** *S.D Memorial Sr Sec School (2020):*   ***80%***
- **10th,** *H M Sr Sec School (2018):*   ***75%***

SKILLS

T**ools**: Python, C++, MySQL , HTML ,CSS ,PostgreSQL, Git

Applications: Machine learning, Backend Development, AWS EC2, Django , Flask

PROJECTS

- **Parking management system(4/2023):** *Created the model using library opencv, Panda, acquired data . It is system build using Python language .It main is to manage parking in commercial sector .*
- ***Market Sale prediction*(3/2024):** *these projects is Machine learning model ,which predict or basically it classify there variable using input in numerical data and the output accuracy 98% better than norm classification model.*
- Ecommerce_Site : Creating a ecommerce site using Django . create models like Login , register through email Category, Products , Accounts . Getting more insights how Real world API works behind the scene
